**PRESS RELEASE**  
**January 2019**

We are pleased to confirm our Pacific Region Partners, Twin Disc Pacific, have a new Seatorque location, Gold Coast, Australia at the Boatworks precinct at Coomera. This facility will become the “National Marine Centre” for Seatorque products.

The Boatworks, owned by Tony Longhurst and his family is currently going through rapid expansion that will bring even larger numbers of vessels to the region. Visit the below link for more information <https://www.theboatworks.com.au/expansionhappeningnow/>

This move will perfectly position Twin Disc Pacific to capitalize with its range of market leading marine products and expertise, while providing excellent support to manufacturers in the region, such as Riviera Yachts. Riviera offers Seatorque Propulsion Systems exclusively on their highly acclaimed Riviera 68 and Riviera 72 Sports Motor Yachts.

Our new location will provide excellent frontage and exposure especially to the main road entering the marine precinct from the Gold Coast.

Gold Coast will be a full branch entity of Twin Disc including showroom, offices, meeting rooms, warehouse and workshop for minor repairs.
